

Group Pensions & Administration

Highams Group has been a specialist within the Insurance services sector for over 20 years. This focused approach has been made possible through our experienced team of niche IT and insurance experts and has rewarded us with a superb client base.

One of the key benefits that our clients rely upon is our extensive knowledge of business and IT trends, particularly with regard to software applications within the pensions industry. This ensures that we are always able to support them with the right resources no matter which system our clients choose. One such area which Highams specialises in is Group Personal Pensions Administration systems.

There are a number of different pensions administrations software packages available on the market, for which Highams can provide experienced staff in a variety of roles:
